

CRM Automated Email Breakdown

Current transactional emails sent by the SMPLFIX CRM. This document reflects the implemented CRM email flows and separates customer, vendor, internal staff, and account emails.

Scope: transactional emails only; in-app notifications are excluded. CRM-queued emails retry temporary failures up to five times. Some messages are event-triggered; others follow a staff action such as sending a quote or proposing a schedule.

Customer emails

EMAIL / RECIPIENT	WHEN THE CRM SENDS IT	SUBJECT LINE	WHAT THE EMAIL CONTAINS
Request received Customer	Automatically after a website service request is submitted.	We received your request - [Request Ref]	Confirms the request reference and contact details. Includes a secure link to complete missing service information when required.
Service quote ready Customer	When staff sends an approved customer-facing quote from the CRM.	Your smplfix service quote - [Quote Ref]	Shows quote total and validity date. Includes a secure link to view, download, approve, or request changes.
Quote approval confirmed Customer	Automatically after the customer approves the quote online.	Approval confirmed - [Quote Ref]	Confirms the approved revision, total, entered name, and recorded date/time. Clarifies that scheduling is still separate.
Quote change request received Customer	Automatically after the customer requests changes to a quote.	Change request received - [Quote Ref]	Confirms the requested changes and tells the customer that a revised quote will be sent.
Service scheduled Customer	Automatically after the vendor accepts the proposed schedule.	Your service is scheduled - [Request Ref]	Confirms service, date, Arizona time window, property address, and access instructions.
Completed work and invoice Customer	Automatically when job completion and required photos are submitted.	Review completed work and invoice - [Invoice No.]	Includes completion details, before/after evidence, invoice amount, payment instructions, and a secure closeout link.
Closeout reminder Customer	Automatically 48 hours after completion if customer review is still pending.	Closeout reminder - [Request Ref]	Reminds the customer to review the completed service, invoice, payment instructions, and closeout decision.
Satisfaction confirmation Customer	Automatically after the customer confirms satisfaction.	Thank you for your feedback - [Completion Ref]	Confirms that the customer marked the completed service as satisfactory.
Issue received Customer	Automatically after the customer reports an issue during closeout.	We received your concern - [Completion Ref]	Confirms that the concern and customer message were recorded for staff review.
Resolved service review Customer	When staff marks a reported closeout issue as resolved.	Please review the resolved service - [Request Ref]	Shows the recorded resolution and returns the customer to the secure review and closeout page.
Payment proof received Customer	Automatically after the customer uploads payment proof.	Payment Proof Received - [Invoice No.]	Confirms proof reference, invoice number, amount, and pending staff verification status.
Payment proof verified Customer	Automatically after staff verifies the submitted payment proof.	Payment Proof Verified - [Invoice No.]	Confirms verification and that the CRM marked the payment received.
Payment proof rejected Customer	Automatically after staff rejects the submitted proof.	Payment Proof Needs Attention - [Invoice No.]	Shows the rejection reason and tells the customer they may upload a replacement proof.

Vendor emails

EMAIL / RECIPIENT	WHEN THE CRM SENDS IT	SUBJECT LINE	WHAT THE EMAIL CONTAINS
Vendor onboarding invitation Vendor	When staff invites a vendor or requests application changes.	Your smplfix vendor onboarding invitation	Includes assigned service category, staff message, secure one-time form link, and link expiration.
Application received Vendor	Automatically after the vendor submits the onboarding form and documents.	Vendor application received	Confirms receipt and explains that no action is required while the application is reviewed.
Application decision Vendor	When staff approves or rejects the vendor application.	Your vendor application is approved / Update on your vendor application	Communicates the decision, any staff message, and whether the vendor profile is active.
Quote request Vendor	When staff sends a quote invitation from Incoming Quotes.	Quote requested: [Request Ref]	Shows service and quote references, optional staff message, secure quote form, and expiration time.
Quote revision requested Vendor	When staff requests an updated vendor quote.	Revision requested: [Request Ref]	Explains that an updated quote is required and provides a new secure submission link.
Quote received Vendor	Automatically after the vendor submits a quote.	Quote received: [Quote Ref]	Confirms request reference and total, and states that the SMPLFIX team will review it.
Schedule confirmation request Vendor	When staff proposes a job schedule in the CRM.	Schedule confirmation requested - [Schedule Ref]	Shows customer, service, proposed Arizona start/end time, and secure accept/change-request link.
Work order confirmed Vendor	Automatically after the vendor accepts the proposed schedule.	Work order confirmed - [Schedule Ref]	Confirms the schedule, attaches the work-order PDF, and includes the secure job-completion link.
Schedule change request received Vendor	Automatically after the vendor requests a schedule change.	Schedule change request received - [Schedule Ref]	Confirms that the requested changes were recorded for staff review.
Job completion link Vendor	When staff creates, resends, or rotates a completion link.	Job completion link - [Completion Ref]	Provides the secure page used after the job to upload before/after photos and completion details.
Completion received Vendor	Automatically after job completion is submitted.	Completion received - [Completion Ref]	Confirms the service completion and the Arizona date/time recorded by the CRM.

Internal staff emails

EMAIL / RECIPIENT	WHEN THE CRM SENDS IT	SUBJECT LINE	WHAT THE EMAIL CONTAINS
New website request Operations staff	Automatically after a website request is submitted.	New website request: [Request Ref]	Shows customer contact details, service details, missing intake information, and a Workflow Center link.
Vendor application submitted Vendor-review staff	Automatically after a vendor application is submitted.	Vendor application submitted: [Company]	Notifies staff that the application is ready and links directly to Vendor Reviews.
Vendor onboarding update Vendor-review staff	After approval, rejection, change request, or vendor email delivery failure.	[Vendor onboarding update]: [Company]	Summarizes the decision or delivery problem and links to the vendor review record.
Vendor quote submitted Quote staff	Automatically after a vendor submits a quote.	Vendor quote submitted: [Quote Ref]	Shows vendor, request, total, and a link to compare incoming quotes.
Customer quote decision Quote staff	Automatically after customer approval or a change request.	Customer approved / requested changes to [Quote Ref]	Shows the customer decision, recorded name/time, total or requested changes, and Customer Approvals link.
Vendor schedule decision Scheduling staff	Automatically after vendor accepts or requests schedule changes.	Vendor accepted / requested schedule changes - [Schedule Ref]	Shows request, customer, service, proposed time, and any vendor change message.
Completion and closeout updates Closeout staff	Automatically on job completion, satisfaction, issue report, or issue resolution.	Stage 6 update / Closeout issue reported / resolved	Summarizes the completion or issue and links staff to Completion and Closeout.
Payment proof awaiting review Closeout staff	Automatically after a customer uploads payment proof.	Payment proof awaiting review - [Proof Ref]	Shows customer, request, invoice, amount, and a direct review link.

Account and security emails

EMAIL / RECIPIENT	WHEN THE CRM SENDS IT	SUBJECT LINE	WHAT THE EMAIL CONTAINS
Password reset CRM user	After a user requests password recovery.	Password Reset Request	Provides the secure password-reset link.
Welcome / account credentials CRM user	When an administrator creates an account or resends access details.	Welcome to smplfix - Your Account Details	Provides dashboard login details and asks the user to change the temporary password.

Important operational note

The CRM does not send an email for every internal status movement. It sends emails at key external actions and milestones: intake, quote review, customer decision, schedule confirmation, completion, closeout, and payment proof. This keeps communication useful while preserving a complete email delivery record inside the CRM.

Prepared from the current SMPLFIX CRM implementation.
